

## Special Issue

# Urban Freight Transport and City Logistics

### Message from the Guest Editors

In recent years, the proliferation of e-commerce business models has helped customers to access product information online easily and receive products they ordered whenever and wherever they want. As customers are accustomed to e-commerce services, it becomes crucial to improve the quality of such services. To deal with the problems in the urban logistics environment, wise investment in automation and intelligent algorithms for the logistics systems are critical. By carefully incorporating the existing urban infrastructures with logistics facilities, efficient and sustainable freight transportation is expected to become possible. Furthermore, novel business models will supplement the current urban logistics systems and contribute to achieving the sustainable growth of on-demand business models. Combining research ideas in logistics and supply chain management, operations research, computer science, and transport engineering is necessary to provide differentiated solutions. We invite you to submit papers for this Special Issue. Any relevant papers in the broad areas of logistics innovations in urban areas are welcome.

### Guest Editors

Prof. Dr. Sang Hwa Song

Graduate School of logistics, Incheon National University, Incheon 22012, Korea

Prof. Dr. Taesu Cheong

School of Industrial Management Engineering, Korea University, Seoul 02841, Republic of Korea

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
