

Special Issue

Sustainable Urban Landscape Design for Well-being

Message from the Guest Editors

In this Special Issue, we aim to continue the debate explored at the 2018 RGS conference where we convened two sessions aimed at understanding and amplifying the worth of urban nature. We want to provide a platform for scholarship that not only highlights the contested care of natural urban spaces, but engages theoretically and empirically with the well-being benefits provided by a wide range of natural environments in urban settings. We call on researchers whose work seeks to discover how such benefits can be analysed, valued and intensified, to engage with different understandings and experiences of well-being and connect the material, locational and psychological aspects of landscape, nature and mental health. We therefore also invite papers that examine the influence of political, social, cultural, ecological and/ or economic dimensions of landscape design on well-being outcomes. We welcome empirical explorations of neo-liberalism, austerity, community participation and national/ local policy instruments as they affect the social use and personal experience of urban natural spaces.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
