

Special Issue

Towards a Sustainable Urban Planning for the Green Deal Era

Message from the Guest Editors

The Green Deal and the sustainability perspectives through which we look at cities and territories today highlight the complexity of the challenges that urban planning is facing. Environmental challenges require us, on the one hand, to design responses to rapid and sudden events (such as the effects of climate change or pandemic events), increasing the quality of built and open spaces. On the other hand, they invite us to rethink the role of nature in the city through strategies that aim to increase urban resilience, improve the health of its inhabitants, guarantee food production, etc. In the face of these conditions, we solicit contributions on the following issues:

- How can a resilient transformation of open and public urban spaces be guaranteed by welcoming, at different scales, different forms of nature within them?
- How can safer and more accessible spaces be designed through experimental design techniques and methods, such as Nature-Based Solutions (NBSs)?
- How can 'bottom-up processes and practices' innovate urban planning regulatory tools and design .

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
