# Towards a Sustainable Urban Planning for the Green Deal Era

## Message from the Guest Editors

The Green Deal and the sustainability perspectives through which we look at cities and territories today highlight the complexity of the challenges that urban planning is facing. Environmental challenges require us, on the one hand, to design responses to rapid and sudden events (such as the effects of climate change or pandemic events), increasing the quality of built and open spaces. On the other hand, they invite us to rethink the role of nature in the city through strategies that aim to increase urban resilience, improve the health of its inhabitants, guarantee food production, etc. In the face of these conditions, we solicit contributions on the following issues:

- How can a resilient transformation of open and public urban spaces be guaranteed by welcoming, at different scales, different forms of nature within them?
- How can safer and more accessible spaces be designed through experimental design techniques and methods, such as Nature-Based Solutions (NBSs)?
- How can 'bottom-up processes and practices' innovate urban planning regulatory tools and design.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
