Special Issue

Sustainable Development of Urban Mobility through Active Travel and Public Transport

Message from the Guest Editors

The focus of this Special Issue is to illuminate insights into successful and innovative solutions and developments of urban mobility towards a transition to sustainable travel by active or/and public transport modes. We welcome high-standard original empirical papers, including case studies, methodological papers, and review papers that shed a light on current issues and solutions related to the development of urban mobility through active and public transport travel, such as exploring factors promoting active and public transport behaviour, urban mobility related to individual perceptions, planning practices, the built environment design or the transport system or mode per se. Studies including underresearched areas and/or vulnerable populations are especially encouraged. We also welcome interdisciplinary perspectives. The recent increase in active travel-much due to the COVID-19 pandemic—also brings up new important questions regarding key factors of travel mode choice towards sustainable travel behaviour and of new ways of living in close proximity to home.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
