

Special Issue

Urban Resilience in a Context of Climate Change

Message from the Guest Editors

Climate change is adding pressures and uncertainties for the economy, the environment, and society in general. In urban areas, climate change may affect urban services, such as water or energy supply. Urban resilience refers to reducing risks and damages from disasters and to the ability to quickly bounce back to a stable state.

In this context, the Urban Resilience in a context of Climate Change (URCC) conference will be held online in October 2020 (www.urcc2020). Organized in the framework of RESCCUE, Europe's first large-scale innovation and urban resilience project, this event aims to bring together different actors from academia, administrations, businesses, and local communities to discuss multiple aspects of urban resilience and climate change.

This Special Issue of Sustainability calls authors of the abstracts submitted to the URCC Conference to present innovative research papers coming from the scientific activities carried out in recent years that will advance our knowledge/capability in the field of urban resilience and climate change adaptation.

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
