# Cities and Retail: Sustainable Transformation of Retail in Urban Environments

### Message from the Guest Editor

We invite authors to submit research that focuses on the transformation of urban retail. This Special Issue is particularly framed on the dialectic retail change vs. urban policies, a subject in which contributions will be of great significance to the scientific literature. Supported by this conceptual framework, we invite studies on topics including, among others, retail change, new forms of governance of shopping districts, retail gentrification (city centers, traditional retail markets, and other retail formats), and retail in tourist cities.
