Urban Agriculture, Forestry and Green-Blue Infrastructure as “Re-discovered Commons”: Bridging Urban-Rural Interface

Message from the Guest Editors

With pleasure, we would like to invite researchers in the fields of urban/agricultural planning, ecology, agriculture, and forestry science, with a multidisciplinary approach, to submit papers to the Special Issue. We welcome submissions on evaluations of cultural and recreational ecosystem services or Nature’s Contribution to People. We include the scope of rural areas that are facing serious depopulation, aging, the collapse of tourism, and changes in material flows and productions. Topics include urban–rural collaborations, the practice of LCA assessments of new modus of productions, moves to share brands (such as geographical indications or trademarks), alternative community-based agriculture, and organic agriculture in collaboration with urban residents. One of the fields in the Special Issue is the meaning of “shared green parks, green, agricultural, forest areas, and other natural resources in urban and rural areas” during and after the COVID-19 crisis in 2020.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
