

Special Issue

Local and Global Perceptions About and Uses of Biodiversity

Message from the Guest Editors

Grounded in the humanities for the environment, this is a call for inter- and multidisciplinary papers that seek to reach out to the wider scientific communities and the society at large, and to involve various disciplinary approaches. The aim of this Special Issue, 'Local and Global Perceptions About and Uses of Biodiversity', is to promote a fruitful multidisciplinary exchange and an active debate on the listed themes. Although focusing on biodiversity, we expect ecocultural systems, or integrated 'natureculture' views, will be the main object of the discussions, considering that different species, both human and non-humans and their interrelationships, can be placed at the centre of the debate and be discussed as agents in historical and present-day narratives. We welcome contributions from scholars, researchers, artists, as well as from people from outside academia, in areas that may focus on the plurality of ecosystems and species, and the richness of the natural world, while addressing cultural and social diversities in their multiple entanglements with nature.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
