Special Issue

Vulnerable Road Users in Safe System Approach

Message from the Guest Editors

Road safety is a significant social problem and represents one of the leading causes of death worldwide. Although road safety is improving through significant impact of all stakeholders, the progress remains slow and to some extent misaligned with established targets. Special attention in road safety needs to be given to vulnerable road users who, compared to road users in vehicles, are lacking protection and thus when crash occurs often suffer serious and fatal injuries. Traditionally, vulnerable road users consisted of pedestrians, cyclists, and powered two-wheelers (PTW). However, today other personal mobility devices such as e-scooters, e-bikes and motorized devices for supporting the mobility of people with a disability and the fragile or aged, are becoming increasingly popular and are included in the group of vulnerable road users. In this Special Issue, we aim to tackle the problem of safety of vulnerable road users through the Safe System Approach in order to make another step towards sustainable safety and "Vision Zero".

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
