

Special Issue

Research and Technology for Waste Management and Resource Recovery in a Sustainable Environment

Message from the Guest Editors

Our Special Issue concerns resource recovery of different types of municipal and industrial waste, by-products, side-streams, and residuals via the conversion to value-added products. One of the contributions that this Special Issue aims to achieve is how the substrates generated in the industry can be made useful. For this, various issues such as - production of value-added microbial products by biotechnological methods; - generation of valuable products by thermochemical conversions; - recovery of bioactive compounds and nutrients by extraction methods; - development of sustainable bio-composites from renewable resources, etc. are important topics of this SI. To this end, it is to encourage a productive discussion that can lead to waste reduction. Other contributions for a sustainable economy are for the development of model/process integrations, techno-economic analyses, and life cycle assessment studies for biological production facilities. We are open to contributions from many different disciplines, such as Biotechnology, Chemistry, Environment Technology, Engineering, Food Science, Economy, and more.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
