

## Special Issue

# Exploring Innovative Solutions for Wastewater Treatment

### Message from the Guest Editors

Wastewater treatment technologies are lately being approached from a circular economy perspective, aiming to improve their sustainability further through cost reduction and resource recovery. In this context, there is growing demand for new processes, combinations of technologies, novel materials, and innovative tertiary treatments to minimize environmental and health impacts and improve the cost–benefit analysis of current treatment systems.

Thus we invite you to submit innovative contributions that tackle the impending challenges in wastewater treatment and technologies in terms of their application in a circular economy or that propose improvements on their sustainability. Original research papers or review papers are equally welcome.

- emerging pollutants
- micropollutants
- microplastics
- nanoplastics
- resource recovery
- life-cycle analysis
- cost–benefit analysis
- tertiary treatment

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
