

## Special Issue

# Sustainable Wastewater Treatment by Biotechnologies and Nanotechnologies

### Message from the Guest Editors

The sustainable supply of pure water to people in society is the greatest challenge in most developing and third world countries. Various methods are available for water purification. In recent years, water purification by biotechnologies and nanotechnologies have attracted researchers' attention because these processes are low-cost, ecofriendly and carried out with relative ease. Thus, it is highly important to innovate and develop cost-effective biotechnological and nanotechnological processes for wastewater treatment, to ensure environmental and economic sustainability. This Special Issue aims to provide a platform for global researchers to publish recent developments of biotechnology and nanotechnology in the areas of wastewater and water treatment. Within this context, we would like to invite you to submit your original research and review articles and disseminate and share your new findings on wastewater treatment using biotechnologies and nanotechnologies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
