

Special Issue

Mapping the Reality and Developing the Strategy of Water Resource in Arid/Semi-Arid Regions

Message from the Guest Editors

The aim of this proposed special issue is to reflect the wide variety of water-resource-related topics with their inherent complexity and to highlight the successful showcases and experience to share with global academic peers, industrial partners, and policy makers. The issue will review the nature of the problems that are emerging in water resource management, and policy and institutional challenges of concern. It will also focus on the water resources strategies and options which are important in research, policy, and human resources in order to successfully respond to these challenges. The issue will finally identify future water resource research areas. It is expected that this Special Issue will make a different contribution in water resource practice for various communities and countries around the globe, but with special focus on China.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
