Special Issue

Integrating Social Science Perspectives in Water and Climate Change Management Research

Message from the Guest Editors

Population growth, agricultural intensification, rapid urbanization, and rising demand for energy have contributed to chronic water shortages in many parts of the world, particularly in the Global South. In addition, climate change has influenced the hydrological cycle. which increases the severity and frequency of extreme events such as droughts, and exacerbates the global water crisis. The global water crisis calls for fundamental changes in food and agricultural production practices aligned with sustainability principles. At the micro-level and from a human dimension of climate change, producers—the largest consumers of freshwater resources—should adopt sustainable water management practices and climateresilient strategies. This Special Issue of Sustainability focuses on micro-level interactions between humans and the environment in the context of agricultural and food production. The aim is to further enhance our understanding of preceding processes of farmers' adoption of sustainable water practices and climate change adaption strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
