

## Special Issue

# Integrated Management of Water Distribution Networks and Water Resources

### Message from the Guest Editor

The main aim of this Special Issue, titled “Integrated Management of Freshwater Distribution Networks and the Related Water Resources”, is to focus on advanced approaches regarding the integrated management of the entire freshwater supply chain. This should be done in terms of satisfying the main objectives of the freshwater provider (water utility), which is to guarantee that it will provide its customers with an adequate quantity of water of an appropriate quality, meeting the standards and rules set. The water supply chain must be considered as a whole, starting from the water abstraction point, up until the customers' taps.

Modeling, management, and optimization techniques should all be integrated in order to achieve the above-mentioned goals. Special consideration should be given to advanced techniques regarding the day-to-day management of a WDN (i.e., pressure management via virtual vs. static DMAs, asset management, active leakage management, etc.)

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
