

Special Issue

Sustainable Management of Water Resource and Environmental Monitoring

Message from the Guest Editors

This special issue deals with the challenges for sustainable management of water resource and environmental monitoring issues and climate change problems particular focus semi-arid and arid regions. Furthermore, water resource and environmental parameters affects all levels of the human, climate and natural resources: from sustainable planning, development and policy, to management and withdrawing and monitoring. Remote sensing, GIS, Hydrological modeling and Machine Learning models adapted to sustainability management of water resource is a modern and promising research area. Interest is rising in adopting a sustainable planning and management perspective in these fields. This Special Issue welcomes research and review papers on introduce the various advanced techniques, modeling, climate change, Land Use/ Land Cover, Hydrological models and machine learning approach to sustainable planning and management of water resources with applications applied to solve the water resource and environmental monitoring, water and flood planning and management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
