

Special Issue

Water Resources Governance for a Sustainable Future

Message from the Guest Editor

Water governance refers to determining the equity and efficiency in water resource and service allocation, and balances water use between socio-economic activities and ecosystems. Furthermore, water governance plays a vital role in sustainable development in the developing world. This Special Issue aims to publish high-quality studies on water resources governance and its relation with sustainable development. In fact, this issue seeks research papers from various areas including, but not limited to any of the following topics: water governance in surface water and groundwater management, water governance and climate change, water governance models, transboundary water governance, water governance for sustainable development goals, decision-making tools in water management, public-private partnership in water services, water reuse governance, optimizing water allocation, participatory approaches, hydro-politics, sustainable water management for food security, governance regulations and water politics, real case studies on applying sustainable water governance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
