

Special Issue

Water Management and Environmental Engineering

Message from the Guest Editors

Water is a vital resource for agricultural and industrial operations, as well as domestic use. Nonetheless, the overexploitation of freshwater resources has been generating alarming water scarcity issues worldwide, especially in arid regions. Given that freshwater preservation emerges as a critical challenge in terms of health, environmental, and socio-economic concerns, the design and implementation of water management interventions based on environmental engineering principles has become more imperative than ever. Notably, the United Nations has already introduced the Sustainable Development Goals (SDGs) to set explicit eco-friendly targets by 2030, indicatively referring to universal and equitable clean water access (SDG#6) and responsible use of natural resources, including freshwater (SDG#12). In this light, robust policies and state-of-the-art solutions for water monitoring, optimization, and management should be developed to eliminate risks related to water shortages and/or degradation from both society and industry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
