

## Special Issue

# The Natural and Technical Aspects of Water Management with Special Attention to Protected Areas

### Message from the Guest Editors

This Special Issue invites authors to contribute reviews and research papers on freshwater ecology and protection, water management, sustainable development, and modern techniques and tools for monitoring aquatic ecosystems (rivers, lakes, wetlands) localized within or close to protected areas. The Special Issue aims to publish research results from the following areas:

- Inventory and monitoring of natural habitats;
- Water management of river valleys;
- Implementation of sustainable development principles;
- Environmental impact assessments in protected areas;
- Remote sensing in protected areas;
- Climate changes;
- Protected areas;
- Protection of water resources;
- Problems associated with the exploitation of hydrotechnical devices;
- Inland water transport;
- Best river restoration practices.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
