Sustainable Water Resources Development

Message from the Guest Editor

Water demand is growing across the globe due to an increase in the population. It leads to threats in water resources, ecosystem collapse, and many socioeconomic impacts. In this regard, sustainable water resource development plays a crucial role in meeting the increasing water demand from the local to global scale. Addressing the spatial and temporal value of water in addition to developing new indicators for quantifying the concept of sustainability in water resources can help us to overcome current and upcoming water conflicts and scarcities.

- sustainability
- integrated water resource management
- sustainable developments
- water, energy, and food nexus
- water scarcity
- managed aquifer
- reservoir operation
- climate change

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
