

Special Issue

Technologies and Models to Unpack, Manage Inventory and Track Wasted Food towards Sustainability

Message from the Guest Editors

The aim of this Special Issue is to attract research focused on the wide theme of sustainable food systems, with particular attention paid to the role of technologies that can be applied at the different levels of a food supply chain in order to enhance its sustainability performance. We are confident that this topic will capture a variety of contributions, as it is timely and relevant in modern business environments. Keywords

- Sustainability
- life cycle assessment
- industrial plants
- food waste
- inventory
- tracking and tracing

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
