

## Special Issue

# Appropriate Wisdom, Technology, and Management toward Environmental Sustainability for Development

### Message from the Guest Editor

Protection and maintenance of environmental resources for future generations require responsible interaction with the environment to avoid wasting natural resources. An ancient Native American proverb says, “we do not inherit the Earth from our ancestors; we borrow it from our children”. This indigenous wisdom could certainly substantially define the meaning of environmental sustainability.

Advances in technologies in recent times could sustain humankind and allow living in comfort. However, not all of these advances may sustain the environment for later generations. Developing societies along with keeping the ecosystem sustainable require appropriate wisdom, technology, and management working together.

This Special Issue aims to publish relevant studies on approaches toward environmental sustainability. It appeals for original and novel studies on the provision of responsible consumption, reasonable recycling, and sustainable development of natural resources in different types of environments, including the anthroposphere, atmosphere, biosphere, hydrosphere, and lithosphere. Priority will be given to the works based in developing countries.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
