# Wood Pastures: Drivers for Ecological Sustainability and Conservation Management

### Message from the Guest Editors

We are launching a Special Issue on wood pastures, focused on conservation management and potential drivers of biodiversity. Forest lands have been historically grazed; however, agricultural intensification and human abandonment of rural areas have set wood pastures aside. In recent times, extensive grazing has gained popularity mainly from an increase of social demand towards a more friendly and sustainableproduction of foodstuffs (e.g., organic farming)—this includes the practice of grazing in wood pastures, which is expected to grow. Wood pastures hold exceptional ecological, social, and cultural values. An approach through conservation management is crucial, and should respond to how we proceed to sustain biological diversity.

Maintaining aesthetics, preserving species, and protecting natural stabilizing mechanisms are all valid and not mutually exclusive arguments to address conservation management, and any other tactics to follow the common thread of maintaining (or restoring) natural diversity within the managed stand or landscape are welcome for this Special Issue.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
