

Special Issue

Exploring Sustainable Workplace Environment and Business Innovation on the Corporate Governance Perspective

Message from the Guest Editors

Corporate governance is a set of mechanisms that align the objectives and interests of owners and providers of finance, as well as company managers. This concept has been enriched by sustainability issues. Companies are becoming more sustainability oriented and socially responsible. Innovation plays a significant mediating role in the nexus of corporate governance organizational performance. A sustainable workplace contributes to improving the employees' well-being and involvement in ethical and social decision-making. This Special Issue welcomes theoretical and empirical articles that shed light on this complex nexus of workplace–sustainability–innovation–corporate governance and provides new insights and perspectives on the topic.

- The influence of the education process on The social and environmental responsibility of students;
- The ones investigating sustainable workplace and/or work-life balance, the implementation of sustainable innovation, green innovation, the drivers of innovation, and the development of sustainable corporate entrepreneurship among employees.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
