

Special Issue

Women's Special Issue Series: Sustainable Energy

Message from the Guest Editor

I am delighted to present this special collection of articles highlighting the achievements of women scientists in addressing the challenges related to the energy transition. Energy transition will bring massive opportunities not only the production, transmission efficiency and consumption of energy, but also in the way companies address the key challenges of the transition. In this respect, it will likely create global opportunities for innovation, investments, and partnerships and will strengthen the role of environmental, social, and corporate governance (ESG) factors in companies financial performance and reputation. This Special Issue aim is to spotlight and share findings on innovative solutions that will face the emerging challenges above described, gathering contributions on advanced models, methodologies, technologies, best practices and innovative solutions for making energy systems sustainable and companies resilient. Original research articles, short communications, position papers and reviews are welcome from all authors, irrespective of gender identity.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
