

Special Issue

Youth Climate Activism and Sustainable Civic and Political Engagement

Message from the Guest Editor

This Special Issue aims to collect theoretical and empirical contributions, as well as evaluations of participatory interventions, focusing on “sustainable” youth engagement and participation. Two aspects of the concept will be considered: (a) youth civic and political engagement on sustainability issues (e.g., environmental issues, climate change, social justice) and (b) what factors and processes make youth civic and political engagement and activism “sustainable” (sustainability of the process of participation, in terms of its quality and impact on the participants and on external conditions, e.g., social change). We are interested in contributions addressing different forms and means of participation (individual, collective; online and ICT-supported engagement; etc.) that can illuminate the factors and processes that explain youth engagement with environmental and climate-change-related issues and its persistence, as well as its impact on internal and external conditions. We encourage contributions using mixed methods and following interdisciplinary and participatory approaches.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
