Tecnologie Chimiche, Università  
della Calabria, 87030 Arcavacata  
di Rende (CS), Italy

Deadline for manuscript  
submissions:

**closed (29 September 2020)**

### Message from the Guest Editor

Dear Colleagues,

Asymmetric reactions have assumed growing importance among organic reactions since the beginning of this century. Metal chiral complexes as catalysts, chiral pool, easily available chiral organic products, and chiral organocatalysts have been employed to perform these syntheses.

The widespread dissemination of this topic encouraged me to launch a Special Issue to enrich the knowledge of organic chemists, and, thus, new synthetic methods or reviews collecting data on known reactions are welcome.

This Special Issue will be of interest to organic chemists developing new synthetic methods and others interested in their application to the preparation of chiral organic natural products employable in industry, medicine, and biology.

The audience of potential readers is, therefore, very broad and I hope that many of you contribute your research to this Special Issue.

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (*General Mathematics*); Q1 (*Physics and Astronomy*); Q1 (*Computer Science*)
