

AI-Powered Data Management and Analysis for Cyber-Physical-Systems

Guest Editors:

Prof. Dr. Lianyong Qi

College of Computer Science and Technology, China University of Petroleum (East China), Qingdao, China

Dr. Xiaokang Zhou

Faculty of Data Science, Shiga University, Kyoto 520-0002, Japan

Dr. Xuyun Zhang

Department of Computing, Macquarie University, Sydney, Australia

Deadline for manuscript submissions:

closed (31 January 2024)

Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we welcome submissions addressing the underlying challenges and opportunities, presenting novel techniques, experimental results, or theoretical approaches motivated by data management and analytic problems raised in AI-powered CPS applications.

Topics of interest for this Special Issue include but are not limited to the following:

- Intelligent query optimization for big CPS data management;
- Machine-learning-based CPS data analytics;
- Smart analysis, modeling, and visualization of big CPS data;
- Operational analytics and intelligence of big CPS data;
- Anomaly detection and exception handling in CPS;
- Predictive and real-time analytics in CPS;
- Security and privacy of big data in CPS;
- Trust management and threat detection in CPS;
- Other AI-based data management solutions.

You may choose our **Joint Special Issue** in *Systems*.

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within SCIE (Web of Science), Scopus, CAPus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
