

## Symmetry in Geometric Functions and Mathematical Analysis

Guest Editors:

**Prof. Dr. Stanisława Kanas**

Institute of Mathematics,  
University of Rzeszow, Poland  
skanas@ur.edu.pl

**Prof. Dr. Toshiyuki Sugawa**

Tohoku University  
sugawa@math.is.tohoku.ac.jp

Deadline for manuscript  
submissions:

**21 December 2020**

### Message from the Guest Editors

This Special Issue “Symmetry in Geometric Functions and Mathematical Analysis” is devoted to the publication of high-quality research, especially relating to its geometrical aspects and harmonic and quasiconformal mappings (including applications in allied areas of mathematics and mathematical sciences). The issue will provide a forum for researchers and scientists to communicate their recent developments and to present recent results in the theory of complex analysis of one and several variables, and application in algebraic geometry, number theory, as well as in physics, including the branches of hydrodynamics and quantum mechanics.

## Editor-in-Chief

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science) [search for "Symmetry-Basel"], **Scopus**, and other databases.

**CiteScore** (2019 Scopus data): 2.5, which equals rank 55/368 (Q1) in 'Mathematics', 25/64 (Q2) in 'Computer Science', 25/54 (Q2) in 'Physics and Astronomy', and 17/31 (Q3) in 'Chemistry'.
