Message from the Guest Editor

Dear Colleagues,

In the Special Issue “Information Technologies and Electronics”, we would like to showcase research papers dedicated to the most up-to-date issues of mathematical modeling in control systems, information security, automated systems for data processing and control, nanoelectronics, optoelectronics and nanophotonics, plasma emission electronics, intelligent power electronics, microwave electronics, radiolocation systems, television, telecommunication, and radiometric systems.

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Chemical Abstracts, Inspec, and many other databases.

CiteScore (2019 Scopus data): 2.5, which equals rank 55/368 (Q1) in 'Mathematics', 25/64 (Q2) in 'Computer Science', 25/54 (Q2) in 'Physics and Astronomy', and 17/31 (Q3) in 'Chemistry'.
