Message from the Guest Editors

Dear Colleagues,

The importance and usefulness of subjects and topics involving social data and artificial intelligence are becoming widely recognized. This Special Issue has emerged from the International Conference on Social Data and Artificial Intelligence (SDAI 2019) (Minneapolis, Minnesota, U.S.A.; August 7-9, 2019).

In this Special Issue, we cordially invite and welcome review, expository, and original research articles dealing with the recent advances in the subjects of social data and artificial intelligence, not only from the participants and speakers associated with SDAI 2019, but also from other authors researching these subjects of current interest.

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (NambuKobayashi-Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named Symmetry and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science) [search for "Symmetry-Basel"], Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.3 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2019).
