

Special Issue

Selected Papers Symmetry 2023—The Fourth Edition of the International Conference on Symmetry

Message from the Guest Editors

Participants of this conference are cordially invited to contribute a full manuscript to our [Special Issue "Selected Papers: Symmetry 2023—The Fourth Edition of the International Conference on Symmetry"](#) in the journal *Symmetry*. A number of lectures from the conference will be selected for this Special Issue in the journal *Symmetry*. Among those, five papers will be chosen to be free of charge, while all other accepted contributions will enjoy a 20% **discount** on the publication fees. The Special Issue will represent all disciplines pertaining to the conference where the notion of symmetry plays an important role. Special attention will be paid to interdisciplinary contributions. This themed collection will be closely aligned with the scope of the event. *Symmetry* is indexed within Scopus, SCIE (Web of Science), CAPlus/SciFinder, Inspec, Astrophysics Data System, and other databases and has an Impact Factor of 2.940 and a 5-Year Impact Factor of 2.834.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
