

# Special Issue

## Information Technologies and Electronics: Volume 3

### Message from the Guest Editor

This Special Issue is intended as a natural extension of the previous Special Issues, entitled, "Information Technologies and Electronics", and "Information Technologies and Electronics  $\square$ ", aims to highlight recent advances in:

- mathematical modeling in control systems;
- information security;
- the Internet of Things (IoT);
- robotics;
- big data;
- machine learning;
- artificial intelligence;
- automated systems for data processing and control;
- telecommunications;
- next-generation communication and telecommunication systems;
- electronics;
- and other areas of interest associated with Information Technologies and Electronics.

We welcome articles that present good mathematical or experimental outcomes and a strong substantiation of conclusions and results, and analytical reviews of relevant scientific topics. Submissions are expected to contain original content and have clear scientific novelty.

---

### Guest Editor

Prof. Dr. Alexander Shelupanov

Department of Complex Information Security of Computer Systems,  
University of Control Systems and Radioelectronics, Lenin Ave, 40,  
Tomskaya Oblast, 634050 Tomsk, Russia

---

### Deadline for manuscript submissions

closed (31 October 2024)

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
