Asymmetric and Symmetric Study with PDE

(ASPDE) provides a platform for original research papers bridging the areas of mathematical analysis, computational mathematics, PDE in mathematical physics, engineering sciences, dynamical and complex systems, stochastic processes, boundary valued problems, fractional calculus modeling, continuous-time random walk (CTRW) models, etc. Papers addressing new theoretical techniques, novel ideas, and new analysis tools are suitable topics for this Special Issue of Symmetry. ASPDE accepts review articles of high quality, providing thorough and fast peer-review.

Guest Editors

Dr. Zivorad Tomovski

Department of Mathematics, University of Ostrava, Ostrava, Czech Republic

Dr. Jan Korbel

Department of Science for Complex Systems, Medical University of Vienna & CSH Associate Faculty, 1080 Vienna, Austria

Deadline for manuscript submissions

closed (30 September 2024)

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
