

## Special Issue

# Advances in Computational Chemistry on Symmetry/Asymmetry Biological Active Organic/Inorganic Molecules

### Message from the Guest Editors

I am pleased to inform you about a new Special Issue in *Symmetry*. The area of interest of this Special Issue covers the broad and multidisciplinary subject of computational chemistry. Special interest will be given to the advances in this scientific field, covering DTF and MO studies on biologically active molecules. More specifically, we will target advances, research studies, mini-reviews, reviews, and letters on symmetrical and asymmetrical organic or mixed organic-inorganic molecules. I hope that you will find the area of the Special Issue interesting and suitable for publication.

---

### Guest Editors

Prof. Dr. Anastasios Keramidas

Dr. Manos Vlasίου

Dr. Kyriaki S. Pafiti

Dr. Charis Kalyvas

---

### Deadline for manuscript submissions

closed (31 October 2023)

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
