

Special Issue

Symmetry in Predictive Control System

Message from the Guest Editor

We are pleased to invite you publish research paper within the scope of Symmetry in Predictive Control Systems. This Special Issue aims to collect recent works on Symmetry in Predictive Control Systems. Predictive control methods are being utilized and researched across a range of fields, such as unmanned systems, mechanical systems, healthcare and biomedical engineering, and so on. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- New Predictive Control Methods;
- Predictive Control in Unmanned Systems;
- Predictive Control in Mechanical Systems;

I look forward to receiving your contributions.

Guest Editor

Dr. Xing Fang

Key Laboratory of Advanced Process Control for Light Industry of the Ministry of Education, Institute of Automation, Jiangnan University, Wuxi 214000, China

Deadline for manuscript submissions

closed (30 June 2025)

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
