

# Special Issue

## Symmetry/Asymmetry: Feature Review Papers

### Message from the Guest Editors

This Special Issue aims to publish high-quality long and complete review papers in *Symmetry*. The Issue will highlight a diverse set of topics related to symmetry/asymmetry phenomena wherever they occur in all aspects of natural sciences (e.g., physics, chemistry, biology, mathematics, materials, engineering science and computer science). We are particularly interested in receiving manuscripts that review experimental and theoretical/computational studies as well as contributions from all disciplines. All submissions should be explicitly related to symmetry studies and the related areas of symmetry already discussed in the journal *Symmetry*.

Prof. Dr. Vasilis Oikonomou

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1  
(General Mathematics)
