

Special Issue

Information Technology and Its Applications

Message from the Guest Editor

This Special Issue aims to provide a forum for presentations and discussions of the recent methodological advances in Information Technology and Its Applications. The Special Issue covers pure research and applications within novel scopes related to multimedia, such as image related technique, image retrieval, and multimedia applications. In addition, it deals with information technologies such as information hiding, IOT, cloud computing and so on. The topics of this Special Issue include, but are not limited to: Multimedia Applications; Image Related; Information Hiding; Pattern Recognition; IOT; Cloud Computing; Machine Learning; Data Mining; Neural Network; Distributed Systems; Software Engineering; Bio-informatics; Information Technology Related Issues.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
ICREA, 08010 Barcelona and Institute of Space Sciences (IEEC-CSIC),
C. Can Magrans s/n, 08193 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1
(General Mathematics)
