

Special Issue

Selected Papers from the 14th International KES Conference

Message from the Guest Editor

In our Special Issue of the journal *Symmetry*, both theoretical and applied articles in the fields of computer science, artificial intelligence and machine learning in all areas of human activity are presented. The authors are encouraged to link the research topic with the application and optimization of intelligent algorithms. Topics related to intelligent decision making include, but are not limited to, intelligent agents, fuzzy logic, multi-agent systems, artificial neural networks, genetic algorithms, expert systems, intelligent decision support systems, information retrieval systems, geographic information systems, knowledge, and systems management. Major applications include but are not limited to agriculture, medicine, economics and finance, education, horticulture, and transportation.

Guest Editor

Prof. Dr. Nikita Andriyanov

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
ICREA, 08010 Barcelona and Institute of Space Sciences (IEEC-CSIC),
C. Can Magrans s/n, 08193 Barcelona, Spain
