

# Special Issue

## Symmetry/Asymmetry in Future Wireless Networks

### Message from the Guest Editors

We are excited to announce a call for papers for the upcoming *Symmetry* Special Issue, which will focus on "Symmetry/Asymmetry in Future Wireless Networks." As we stand on the cusp of a new era in wireless communication, the principles of symmetry and asymmetry are emerging as key determinants in the evolution of our networks. The interplay between these concepts shapes the technical landscape and redefines how we think about network design, optimization, and service delivery. This Special Issue is a unique opportunity to explore the nuanced relationship between symmetry and asymmetry in the context of future wireless networks. We invite you to contribute your research, insights, and innovative ideas to help us understand, predict, and shape the future of wireless communication.

### Guest Editors

Dr. Mingkai Chen

Dr. Lisu Yu

Dr. Han Xiao

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
