

Special Issue

Advances of Network Structures for Cooperative Working

Message from the Guest Editors

This special issue is calling for all the contributions that apply the network structure both symmetric and asymmetric in different application areas at all the levels with the analysis of the impact of the symmetry in the network structure. It intends to show the potential of the network structure from macro to micro level for cooperative working and cooperative task accomplishment related to the symmetry characteristic. All the up-to-date related contributions are welcome to submit.

Guest Editors

Prof. Dr. Yuhua Luo

Department of Computer Science, University of Balearic Islands, Spain

Dr. Pilar Fuster Parra

Department of Mathematics and Computer Science, Universitat de les Illes Balears, Palma de Mallorca, Spain

Deadline for manuscript submissions

31 December 2026

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief
