Special Issue

Recent Advances in Software for Symmetry

Message from the Guest Editors

Symmetry is an extraordinary characteristic which has been widely deployed in diverse research fields of computer engineering. This Special Issue invites original research that investigates software technologies related to the concept of symmetry. Potential topics include, but are not limited to:

- Software engineering;
- Software for the Internet of Things (IoT);
- Software for autonomous vehicles;
- Software for cloud computing;
- Mixed/virtual/augmented reality;
- Games;
- Artificial Intelligence (AI);
- Computer vision;
- Computer graphics;
- Hardware systems for software.

Guest Editors

Dr. SeongKi Kim
Division of SW Convergence, Sangmyung University, Seoul, Korea

Prof. Dr. Muhammad Fazal Ijaz
Department of Intelligent Mechatronics Engineering, Sejong University, Seoul 05006, Republic of Korea

Deadline for manuscript submissions

closed (31 October 2023)

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
