Special Issue

Feature Papers in 'Physics' Section 2024

Message from the Guest Editors

We are pleased to announce this new Special Issue "Feature Papers in 'Physics' Section 2024" online. We aim to introduce new insights into science development or cutting-edge technology related to the physics and symmetry field, which are expected to make a great contribution to the community. The issue will cover topics, original research, and peer-reviewed articles related to the latest research and developments in any field of physics where symmetry plays a key role. In general, this Special Issue will be a platform for researchers to publish their scientific work, helping them to influence the scientific community as well as the general public.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
