

# Special Issue

## Simulation and Modelling in Natural Sciences, Biomedicine and Engineering III

### Message from the Guest Editor

It is an absolute pleasure to welcome you to this Special Issue, titled "Simulation and Modelling in Natural Sciences, Biomedicine and Engineering III", of the reputable MDPI Journal *Symmetry* with the best papers from the Interbit Conferences 2022. The Special Issue will bring together applied mathematicians, computer scientists, physicists, chemists, Earth scientists, and engineers from all branches of engineering to present new hot topics and state-of-the-art results in mathematical modeling and simulation in natural science and engineering. Modern algorithms, numerical analysis methodologies, simulation techniques, soft computing, artificial intelligence, intelligent systems, computer techniques, cloud computing, and parallel algorithms, as well as their applications in natural sciences, engineering, finances, and medicine, are welcome. A strong network of eminent colleagues will support our review in order to give to our publisher (MDPI) important scientific and technical results, increasing the impact of the journal in our academic community.

### Guest Editor

Prof. Dr. Nikos Mastorakis

Department of Industrial Engineering, Technical University of Sofia,  
Bulevard Sveti Kliment Ohridski 8, 1000 Sofia, Bulgaria

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
