

Special Issue

Recent Advances in Social Data and Artificial Intelligence 2019

Message from the Guest Editors

The importance and usefulness of subjects and topics involving social data and artificial intelligence are becoming widely recognized. This Special Issue has emerged from the International Conference on Social Data and Artificial Intelligence (SDAI 2019) (Minneapolis, Minnesota, U.S.A.; August 7–9, 2019).

In this Special Issue, we cordially invite and welcome review, expository, and original research articles dealing with the recent advances in the subjects of social data and artificial intelligence, not only from the participants and speakers associated with SDAI 2019, but also from other authors researching these subjects of current interest.

Guest Editors

Prof. Dr. Hari Mohan Srivastava

Department of Mathematics and Statistics, University of Victoria,
Victoria, BC V8W 3R4, Canada

Prof. Dr. Gautam Srivastava

Department of Mathematics and Computer Science, Brandon
University, Brandon, MB R7A 6A9, Canada

Prof. Vijay Mago

Lakehead University, Canada

Deadline for manuscript submissions

closed (30 April 2021)

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
