

# Special Issue

## Symmetries in Art, Nature, and Biomolecules

### Message from the Guest Editor

Mathematical relationships and physical properties are studied for diverse classes of systems. In this Special Issue, particular emphasis will be given to works of art inspired by biomimetics, to art related to physical phenomena, and to art inspired by the pure joy of mathematics. Further, novel and interesting new aspect of biomolecules, e.g., geometry and possible other symmetries of proteins and DNA will be of interest, as well as the prospects of tilings and close-packing of geometrical objects.

### Guest Editor

Prof. Dr. Jakob Bohr

Department of Applied Mathematics and Computer Science, Technical University of Denmark, Lyngby, Denmark

### Deadline for manuscript submissions

closed (30 November 2020)

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPus / SciFinder, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
