

Special Issue

Symmetry in Nonlinear Dynamics and Chaos II

Message from the Guest Editor

This Special Issue, “Symmetry in Nonlinear Dynamics and Chaos II”, is a continuation of our previous Special Issue on the topic “Symmetry in Nonlinear Dynamics and Chaos”, which was an incredibly successful first issue. Nonlinear dynamics and chaos have collaborated to increase our understanding of order and pattern in nature. In recent years, notable advances have been achieved in nonlinear dynamics and chaos theory. However, many theoretical analyses, experimental studies, and practical applications remain to be further explored. The aim of this Special Issue is to collect contributions on recent developments regarding chaotic systems and nonlinear dynamics in all fields of science and engineering. The Special Issue welcomes papers on discrete-time and continuous-time systems, and their applications in modeling psychical, chemical, biomedical, social, and economic systems together with engineering applications. Theoretical and experimental studies, hardware developments, and implementations highlighting advances in nonlinear dynamics and chaos are also welcomed.

Guest Editor

Prof. Dr. Sergio Elaskar

Departamento de Aeronáutica, Instituto de Estudios Avanzados en Ingeniería y Tecnología (IDIT), FCEfYN, Universidad Nacional de Córdoba and CONICET, Córdoba 5000, Argentina

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Editor-in-Chief

Prof. Dr. Sergei Odintsov
ICREA, 08010 Barcelona and Institute of Space Sciences (IEEC-CSIC),
C. Can Magrans s/n, 08193 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1
(General Mathematics)
