Selected Papers on Nonlinear Dynamics

Message from the Guest Editor

The 3rd Conference on Nonlinearity is an international conference that will be held on Sep 4–8, 2023. This is the third conference in a series of conferences on nonlinearity that we plan to continue in the future within a period of two years. [The 1st Conference on Nonlinearity](#) was held on Oct 11–12, 2019 in Belgrade, Serbia, and the [the 2nd Conference on Nonlinearity](#) was held on Oct 18–22, 2021. The main organizer is the [Serbian Academy of Nonlinear Sciences \(SANS\)](#). There are also several coorganizers from Serbia. We cordially invite researchers working in these fields to contribute original research papers or review articles to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
