

Special Issue

Visual Processing of Symmetry

Message from the Guest Editors

We are pleased to announce a new Special Issue in the journal *Symmetry*, associated with the 7th annual Visual Properties Driving Visual Preference (VPDVP) workshop (<https://www.bertamini.org/lab/vpdvp.html>) at the University of Liverpool. We welcome articles that report new insights into the neural processing of visual symmetry, obtained with either brain imaging or behavioural methods.

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
